

# VICENTE TORNS POLICY ON "CONFLICT MINERALS"

VICENTE TORNS is committed to the responsible supply and operation of a supply chain free of the so-called "Conflict Minerals" (cassiterite, columbite-tantalite "Coltan", wolframite and its derivatives, gold + tin + tantalum + tungsten = "3TG ") coming from the Democratic Republic of the Congo "DRC" or surrounding countries (together, the " conflict zone ") whose extraction and trade are financing the conflict in those areas.

For this purpose, VICENTE TORNS establishes the following commitments:

- To request to copper suppliers to adopt a "Conflict Free" policy if they have not already done so.
- To request them declarations (CFSI-CMRT) ensuring that the copper that they are supplying to us, does not intentionally contain any of these elements that come from the "Conflict Zones".
- Do not work with a copper provider that cannot declare that the product supplied is "Conflict Free" or cannot demonstrate that is taking reasonable, good-faith steps towards that goal.
